

Unstoppable: We deliver future

Dear VACOM Partner,

the corona virus has presented us with challenges for over one year. But it won't stop us from continuing to work for you with full commitment. We have developed hygiene and other infection protection concepts to protect our employees and thereby we ensure our productivity – which remains reliable and with the usual quality. We owe it to our competent employees that you can rely on VACOM even in these difficult times.

Several teams in the productive area ensure that production, cleaning and logistics are fully operational. At the same time, we have divided our employees into teams. Thereby we ensure that there are no meetings between these groups during the shift change and in the break and changing rooms. This can prevent cross infections. Thanks to digital equipment, our sales and administration employees can be reached as usual in mobile work.

The health of our employees is very important to us. For this reason, the VACOM task force has regular meetings to discuss the current developments of the corona pandemic. This enables us to ensure that all regulations and laws are complied with. Since the beginning of the pandemic, there have been over 114 meetings with representatives from the workforce, occupational safety officers and department heads. We use the corona traffic light to inform our employees about the measures that apply in the current situation. Comprehensive disinfectant dispensers, the option of corona rapid tests, special training courses and additional offers from company doctors help to safely navigate the way through the pandemic.

This is how we ensure smooth production and quality.

We are at your disposal for any questions.

Until then, we wish you all the best. And most importantly: stay healthy!

Your Vacom team

Unstoppable: We deliver future!
